Audience

Student affairs leaders, advisors, and dean of students offices at four-year residential universities

Subject

Introducing the Social Engagement Accelerator: See Student Isolation Before It Becomes a Problem

Body

Student social isolation is one of the strongest predictors of departure, and it almost never shows up in a traditional report. The Social Engagement Accelerator changes that by pulling engagement signals from across campus, clubs, dining, events, housing, into a single staff-facing dashboard. Advisors get a live engagement score for every student, trend data over time, and an outreach workflow built directly into the platform. No more waiting for a withdrawal form to flag a student who needed support weeks earlier.
