Audience

Advisors, student success directors, and institutional research staff at four-year residential universities

Subject

Webinar: From Fragmented Data to Early Intervention, Building a Student Engagement Strategy That Works

Body

Most campuses have the data to identify a struggling student. The problem is that it lives in ten different systems and nobody is looking at all of them at once. In this webinar, we will walk through how institutions like UAH have built a connected reporting foundation with Argos, and how the Social Engagement Accelerator takes that foundation a step further by turning engagement signals into advisor action. You will leave with a clear picture of what a modern student success data strategy looks like and how to make the case for it at your institution.
