

Outline:

Home

- Welcome heading
- Overview, short synopsis of the portfolio
- General Navigation, brief guide pointing to other pages
- Featured highlight linking directly to the Mock Product and Capstone

About

- Me
 - Background
 - Education
 - Experience
 - Career goals
- Evisions
 - Brief background of the company
 - Link to read more about the company
- Internship
 - Why this internship and how I got started
 - Weekly structure, departments by week and Friday bonus courses
 - Shadow days

Projects

- Sidebar navigation with five sections, Department Weeks, Mock Product, Capstone, Bonus, and Shadow Days
- Breadcrumb text at the top of every detail page showing the current location within Projects
- Department Weeks
 - Overview page with the flow map of Week 1 through Week 7
 - One shared template for every week detail page, containing a summary, project assignments, reflections, skills, and navigation to the previous or next week
- Mock Product
 - Single page with a description, reflection, preview window, and skills
- Capstone
 - Single page with a description, reflection, preview window, and skills
- Bonus
 - Overview page with the four course topics, Philanthropy, Communications, Connections, and Business
 - One shared template for every course detail page, containing a summary, project assignments, reflections, skills, and navigation to the previous or next course
- Shadow Days
 - Single page with a summary, project assignments, reflections, and skills

Reflection

- Experience, challenges, and highlights
- Insights and advice gained from employees
- Next steps after the internship
- Advice for anyone in a similar position

Resume and CV

- Resume and CV shown side by side
- Each includes a view link and a download option with format selection

Contact

- LinkedIn link
- GitHub link
- Email address

Design:

Layout and Structure

- Vertical landscape orientation for the overall site
- Top navigation bar fixed across every page
 - Name positioned far left in a larger font size to anchor the brand
 - Section buttons, Home, About, Projects, Reflection, Resume, Contact, aligned to the right
 - Active page indicated with a highlighted button, as shown in the wireframe with the gold fill on the current section
- Sidebar navigation reserved for the Projects page only, since it holds the most subpages
- Breadcrumb text at the top of Project detail pages to reinforce location within the site

Color Palette

- Clean and natural tones, light blues, azures, and aqua greens as the core palette
- One accent color carried through for active states and highlights, similar to the gold used in the wireframe nav bar
- Neutral background, likely white or a very light gray, to let the color palette stand out without feeling overwhelming
- Soft gray for sidebar and card backgrounds to create separation without adding visual weight

Shape Language

- Rounded square shapes used consistently across cards, buttons, and containers
- Skills listed as rounded rectangle capsules, matching the green skill tags shown in the wireframe
- Preview windows and project cards carrying the same rounded corner treatment for consistency

Typography

- Clean sans serif font family throughout
- Clear hierarchy from titles to subtitles to headers to body text

- Bold used for section headers and key labels, similar to how the wireframe bolds field names like Description and Reflection
- Italic reserved for supporting or secondary text, used sparingly so it retains emphasis value
- Consistent sizing scale so titles, subtitles, and headers are visually distinct at a glance

Iconography

- Icons included in the Get in Touch section, one for each platform, LinkedIn, GitHub, and Email
- Icon style kept simple and consistent, likely line based or filled to match the flat, clean aesthetic of the rest of the site
- Icon use extended sparingly elsewhere, such as beside each Project sidebar item, to aid quick recognition without cluttering the design

Component Consistency

- Skills capsules, project cards, and preview windows sharing the same rounded corner radius so the site feels unified
- Buttons in the nav bar and any call to action buttons, such as view or download links, following the same shape and color logic
- One shared template maintained for repeating pages, such as Department Weeks and Bonus Courses, keeping the rounded card and capsule styling consistent across the whole Projects section
- Consistent spacing scale between sections so the light color palette and rounded shapes do not feel cramped
- Subtle hover state on nav buttons and project cards, perhaps a slight color shift within the palette, to reinforce interactivity without breaking the clean aesthetic
- Warm accent color used sparingly, similar to the gold in the wireframe, to help important elements like active nav items and buttons stand out

Navigation and Usability:

- Persistent top navigation bar present on every page so the main sections are always one click away
- Sidebar navigation within Projects acting as a secondary layer, so visitors never have to return to the top nav to move between subpages
- Breadcrumb trail on every Project detail page, showing the path such as Projects, then Department Weeks, then Week 3, so visitors always know where they are
- Previous and next links at the bottom of repeating templates, such as Department Weeks and Bonus Courses, allowing sequential browsing without needing to return to the overview each time
- Return to Overview link included alongside previous and next, giving a shortcut back to the top of that subsection
- Clickable highlight on Home linking directly into Mock Product and Capstone, offering an early shortcut into the meat of the site for visitors who want to skip ahead

- Consistent placement of navigation elements across pages, top bar always at the same height, sidebar always in the same position, so the eye does not have to relearn the layout on each page
- Limited number of choices at each navigation level, five sections in the top nav and five sections in the Projects sidebar, keeping decision making simple at any point in the site
- Clear visual distinction between active and inactive nav states, using the accent color, so visitors always know which page or subpage they are viewing
- Logical grouping of content by function, preface pages first, project content in the middle, closing pages last, so the structure itself guides the visitor through a natural sequence
- Adequate whitespace between sections so pages do not feel dense, supporting quicker scanning and easier reading
- Consistent card and button sizing throughout, so interactive elements are easy to predict and locate at a glance
