

A. Event Title:

SEA What Matters 2026

B. Event Goals:

1. Promotion

Covers everything that drives awareness and registration for the conference before it happens. It includes the email campaigns, social media content, paid ads, and any partner or community channel outreach. The purpose is to fill seats and make sure the right people, advisors, student success directors, IR (Institutional Research) staff, know the event exists and have a reason to show up.

2. Live Demo + Product Support

Showing the SEA in action during the conference rather than just talking about it. Attendees get hands-on time with the platform, guided by the Evisions team, so they can ask real questions about their specific use cases in real time. It doubles as a support touchpoint, catching friction points or misunderstandings that clients may not have escalated through normal channels.

3. Product Transparency and Validation

The idea is to present real usage data and outcome metrics that demonstrate what the SEA does well, where engagement scores have led to successful interventions, and where the platform has hit its limits. The "where it fails" piece is actually a strength if framed correctly. Showing honest data about edge cases, gaps, or institutions where the tool underperformed builds trust with the audience and positions Evisions as a partner rather than just a vendor pushing a product. It also feeds directly into the roadmap conversation.

C. Interactive Activity

1. Problem Solving Tables

Each table gets a common school challenge, like students falling behind, lack of communication, or low engagement.

Goal: Let schools share ideas and connect SEA real problems.

2. SEA Feature Pitch

Allow attendees to pitch their ideas for the SEA (improvements, suggestions, etc.) and see who comes up with the best idea to implement. Whoever wins will get a prize at the end.

Goal: Let the people using the SEA tell us what to build next.

3. Troubleshooting

Users will be able to ask any questions and get an in person guide to navigate the SEA

Goal: Find ways to make the SEA more user friendly

4. Product Workshop

Users will follow along with the Evisions team on their own device as they guide them through the SEA from the ground up, covering every major feature in a structured, hands-on walkthrough.

Goal: Make sure every attendee leaves knowing the full capability of the platform.

D. Presentations

1. SEA Data & Student Success Results

Description: Will help showcase real Data behind the SEA and how it has helped improve student Outcomes.

2. Connecting Students to the support they need

Description: Will show how the SEA helps schools create a stronger connection between students, staff, and support services.

3. Referral feature: What it is and how it works

Description: Presenting the specific feature to demonstrate the capabilities and use in receiving positive reports.

4. Building a Student Success Ecosystem: How Engagement Data Fits Into the Bigger Picture

Description: Presentation on how the SEA fits alongside the other tools and systems an institution already has (Banner, LMS platforms, advising software, etc.),

and how engagement data becomes more powerful when it is connected to academic and financial aid signals rather than sitting in its own silo.

5. The Early Warning Advantage

Description: A case-based presentation walking through real intervention timelines, showing how much earlier the SEA flags a struggling student compared to traditional academic indicators like GPA drops or missed assignments.

6. Coming soon

Description: Show a sneak peek of new features or products that are in the works and give a brief overview of what they are. Users can possibly do a short demo.

7. SEA the stats: See what statistics the application provides

Description: Shows what data the application can provide and go over how it can be used by schools to help students/staff.

8. SEA how we made it: how the YOU inspired the creation of SEA

Description: Go over the creation of the SEA application and see how students and staff helped us make something to solve everyone's issues
