PROFESSIONAL SUMMARY

Computer Science graduate (University of Alabama in Huntsville, Cum Laude) with a concentration in AI & Data Science. Experience spans programming, software testing, data analysis, product design, and technical writing, developed through internships and academic projects. Motivated to deepen technical expertise through real-world work, bringing a fast-learning, adaptable approach to new tools and problem-solving environments.

EDUCATION

B.S. Computer Science with AI & Data Science Concentration

University of Alabama in Huntsville | Aug 2022 – May 2026

- GPA: 3.7/4.0, Cum Laude
- SGA Senator, 2025–2026

RELEVANT EXPERIENCE

People and Culture Success Intern

Evisions | Remote | May – July 2026

- Gained cross-functional exposure across 7 departments (Product & UX, Engineering & QA, Professional Services, Marketing, Support & DevOps, Finance & HR, and Customer Success & Sales) over 8 weeks, mapping how a B2B software company operates from pitch to purchase.
- Designed the Social Engagement Accelerator, a dashboard concept for flagging at-risk students, drawing on market research to shape its wireframes and steer the product roadmap.
- Delivered more than 15 go-to-market assets, including buyer personas, an SLA framework, and a financial forecast, then presented the plan as the program's capstone.

QA Tester

Fintegrate Technology | Trussville, AL | May – June 2026

- Stabilized the Playwright test suite for FusionDMS, a dispute-resolution platform used by banks and credit unions, rerunning over 106 TypeScript specs to separate real regressions from environment flakiness under direct mentorship from the CTO.
- Audited 39 user-facing workflows against the live app to score test coverage and risk, uncovering 18 workflows with no coverage and 8 passing tests that hid real bugs, including a permission check that let restricted users through.
- Engineered 23 new Playwright tests to close the highest-risk gaps, including a full role-based access matrix, then documented the project in an acceptance testing report for the engineering team.

Technical Writer Intern

Book Systems Inc. | Huntsville, AL | January – May 2025

- Modernized outdated technical manuals for 3 library-management products (Atrium, Librista, and Booktracks) into task-oriented instructions for end users.
- Unified documentation style across all 3 product lines over 5 months, completing 9 to 10 revision tasks per sprint.
- Collaborated with a writing team to align terminology and formatting across manuals, creating a more seamless experience for end users switching between products.

PROJECT EXPERIENCE

Airline Load Factor & Airfare Analysis

University of Alabama in Huntsville | Huntsville, AL | April – May 2026

- Architected a 6-stage data science pipeline integrating 5+ datasets (airline competition, ticket pricing, flight delays, fuel costs, load factors) to analyze correlations between airline operations and airfare across 50K+ flight records.
- Developed 3 regression models (correlation analysis, linear regression, and PCA regression with dimensionality reduction) to predict airfare from operational load factors, benchmarking performance with RMSE, MAPE, R^2 , and SNR.
- Structured the codebase into modular, reproducible pipeline stages and generated visualizations (heatmaps, scatter plots, diagnostic panels) to communicate results to the project supervisor.

Pira-See: Pirate Simulation & Analysis Platform

University of Alabama in Huntsville | Huntsville, AL | January – May 2026

- Contributed as a core team member on a full-stack simulation and regional data analysis platform supporting 1,000+ concurrent users.
- Implemented React front-end interfaces for creating, configuring, and comparing simulation runs, including a regional framework for adjusting participant rates and time parameters.

- Containerized development and production environments with Docker Compose, then tested and optimized the deployment pipeline for stable uptime.

Binary Classification: Income Prediction Using ANN & SVM

University of Alabama in Huntsville | Huntsville, AL | November – December 2025

- Conducted a comparative analysis of 2 machine learning algorithms, artificial neural networks and support vector machines, for binary income classification.
- Built and calibrated a neural network architecture (forward propagation, backpropagation, gradient descent) alongside an SVM pipeline with kernel selection and parameter tuning.
- Evaluated both models on accuracy, precision, recall, and F1-score, then summarized the trade-offs between model complexity and interpretability.

ADDITIONAL EXPERIENCE

Student Specialist IV

UAH College of Business | Huntsville, AL | January – April 2026

- Interviewed and profiled 5 of 20 honorees for the College of Business "Top 20 of 2026" magazine, writing feature stories in AP style.
- Led peer-review sprints with a 4-person writing team, catching consistency errors across all 20 profiles before publication.
- Coordinated shared deadlines across the writing team, helping the group's work earn a dedicated feature in the magazine's writer section.

Brewista

7Brew Coffee | Huntsville, AL | May 2024 – October 2025

- Operated the Touchpoint POS for orders, payments, and rewards, keeping order-to-drink times under 5 minutes.
- Balanced drink prep and restocking inside with lane management outside on a crew of 5 to 8, helping drive a 10 to 15% increase in sales by promoting deals like buy-one-get-one-free offers.
- Built rapport with regulars and new customers through friendly service, driving strong customer retention.

SKILLS

Programming & Development: C#, C++, JavaScript, Python, Docker, GitHub, Playwright, VS Code

Design & Visual Tools: Adobe Acrobat, Canva, Miro

Writing & Productivity: AP Style Writing, Microsoft Office, Zotero
