PROFESSIONAL SUMMARY

Computer Science graduate from the University of Alabama in Huntsville (UAH) with practical experience in programming, software testing, data analysis, product design, technical writing, and applied machine learning gained through internships and projects. Learns new tools quickly and adapts well to unfamiliar problem-solving environments. Looking for an entry-level software development role with room to grow into AI-focused work.

EDUCATION

University of Alabama in Huntsville
B.S. Computer Science with AI & Data Science Concentration

- GPA: 3.6/4.0, Cum Laude
- Honors College Member
- Student Government Association Senator

Huntsville, AL
May 2026

WORK EXPERIENCE

Evisions
People & Culture Success Intern

Remote
May 2026 – July 2026

- Collaborated with an intern cohort across 7 departments, including engineering, product, marketing, finance, and sales, to produce 15+ go-to-market assets (buyer personas, SLA framework, financial forecast) for the program's capstone presentation.
- Conceived and pitched the Social Engagement Accelerator, a dashboard prototype for identifying at-risk students, as the program's capstone deliverable.

UAH College of Business
Student Specialist IV

Huntsville, AL
January 2026 – April 2026

- Interviewed and profiled 5 honorees for the “Top 20 of 2026” magazine, crafting AP-style feature stories that captured each subject's achievements and personality.
- Led peer-review sprints with a 4-person editorial team, refining tone, consistency, and accuracy across all 20 published profiles before release.

Book Systems, Inc.
Technical Writer Intern

Huntsville, AL
January 2025 – May 2025

- Reengineered technical manuals for Atrium, Librista, and Booktracks with guidance from the technical writing team, restructuring legacy content into task-oriented user guides.
- Delivered 9–10 manual revisions per sprint over 5 months, standardizing terminology and layout across all product lines to improve usability and brand cohesion.

7 Brew Coffee
Brewista

Huntsville, AL
May 2024 – October 2025

- Operated the Touchpoint POS system for orders, payments, and rewards, sustaining under-5-minute order-to-drink times during peak rushes through coordinated teamwork.
- Partnered with fellow brewistas to balance drink prep and lane management, driving a 10–15% sales increase by promoting limited-time offers and loyalty deals.

PROJECT EXPERIENCE

Evisions
Digital Portfolio

Remote
July 2026

- Designed and built a 20+ page personal portfolio site in HTML5, CSS3, and vanilla JavaScript, deployed via GitHub Pages, to document a full summer internship across 7 department rotations, a capstone project, and a resume/contact hub in one cohesive, publicly shareable site.
- Utilized Claude AI throughout the design and development process, using it to draft page layouts, debug responsive CSS, and iterate quickly on content structure, shipping a maintainable, well-organized static site ahead of schedule.

Fintegrate Technology

Trussville, AL

FusionDMS QA Testing Project

May 2026 – Present

- Diagnosed instability in FusionDMS, a fintech dispute management platform for banks and credit unions, working directly with the CTO to rerun 106 automated tests and isolate 69 of 85 failures (80%+) to a single shared defect.
- Audited all 39 major features, identified 18 untested modules, and engineered 23 new automated tests, expanding coverage toward a 203-item test plan for the next release that includes 45 Visa-integrated dispute resolution cases.

UAH Department of Computer Science

Huntsville, AL

Big Data Computing Team Project

April 2026 – May 2026

- Engineered a Python pipeline (pandas, scikit-learn, statsmodels) to analyze whether airline load factor correlates with airfare, focusing on Q1 2025 airport data.
- Implemented preprocessing, regression, PCA, and evaluation stages, producing RMSE, MAPE, R^2 , and SNR metrics that quantified the relationship.

UAH Department of Computer Science

Huntsville, AL

Senior Capstone Team Project

January 2026 – May 2026

- Built a maritime encounter simulator using JavaScript, Leaflet mapping, and Docker, enabling visualization of merchant-pirate interactions through a live demo deployment.
- Debugged import/export flows, corrected coordinate handling, and resolved lint issues to stabilize the shared main branch for deployment.

UAH Department of Computer Science

Huntsville, AL

AI & Machine Learning Team Project

November 2025 – December 2025

- Developed a full ML pipeline in Python (NumPy, pandas) to classify Census Income data above/below \$50K using ANN and SVM models.
- Reimplemented both models manually with vectorized operations, cutting training time to ~10 minutes while maintaining predictive accuracy.

UAH Department of Computer Science

Huntsville, AL

Object-Oriented Programming Team Project

January 2025 – April 2025

- Designed a Java desktop matrix calculator (Swing GUI, MVC architecture, Maven build) supporting addition, multiplication, inversion, determinant, and eigen decomposition.
- Configured Maven packaging, authored README and architecture docs, and standardized MVC/Swing documentation across the codebase.

UAH Department of English

Huntsville, AL

Technical Writing Individual Project

November 2024 – December 2024

- Authored an 18-page technical guide, "Installing and Configuring VS Code for C++ on Windows," walking a beginner audience through installing Visual Studio Code, the g++ compiler through MSYS2, and the system PATH configuration needed for compilation.
- Structured the guide into sequential sections, from system requirements through a final "Hello, World!" verification test, pairing each step with annotated screenshots to reduce setup errors for readers unfamiliar with command-line tools.

SKILLS

Programming & Development: C#, C++, Java, JavaScript, Python, Docker, GitHub, Playwright Testing Suite, VS Code**Design & Productivity:** Adobe Acrobat, Canva, Miro, Microsoft Office**Writing & Research:** AP Style Writing, Zotero**CERTIFICATIONS**

-
- AI Fluency Framework & Foundations – Anthropic, May 2026
 - Argos Training Certificate – Evisions, June 2026
