DEPARTMENT
OVERVIEWS

PRODUCT: What We Learned

- Start with the market opportunity
- Choose a specific customer segment
- Use research to prove the problem is real
- Start with the user's question before choosing data
- Data access is a people/process issue, not just a tech issue
- Roadmaps are about tradeoffs

PRODUCT: What We Did

- Defined the product: a Social Engagement Accelerator
- Identified key users
- Mapped user questions to the data needed to answer them
- Researched data schools already have and who owns it
- Prioritized product features into a road map

Social Engagement Accelerator — East Coast

Start with a person and their question, then work right to the data. In the session you'll write ONE row together; finish the rest tonight. (Start Here tab has the full how-to.)

Who's asking?	Their question	Data that could answer it	Who owns it on campus?	Does our school have it?	Can we get it?	Worth pursuing?
residence life coordinator or RA	are students who participate in residence life programs more likely to feel connected to campus and others	housing data, residence hall event data, student surveys on belonging	residence life/ housing	partly	takes some asking	yes
counseling center	which students are reporting loneliness, and does this correlate to low social engagement? possible	student wellness/belonging survey data, event participation data	counseling center/student life	partly	Takes some asking	Keep it
orientation director	which students attended orientation activities who then also joined clubs or attended future events?	orientation attendance data, club sign-ups/rosters, event attendance	orientation/student life	Yes	Takes some asking	Keep it
Dining hall	How many first years go to dining hall at least once a day	Student IDs and check ins	dining services	yes	easy to get	Keep it
Club leaders, Ad	What fraction of people from each grade level join a club	Rosters	Club roster or coach	Yes	Easy to get	Keep it

Product: Key Takeaways

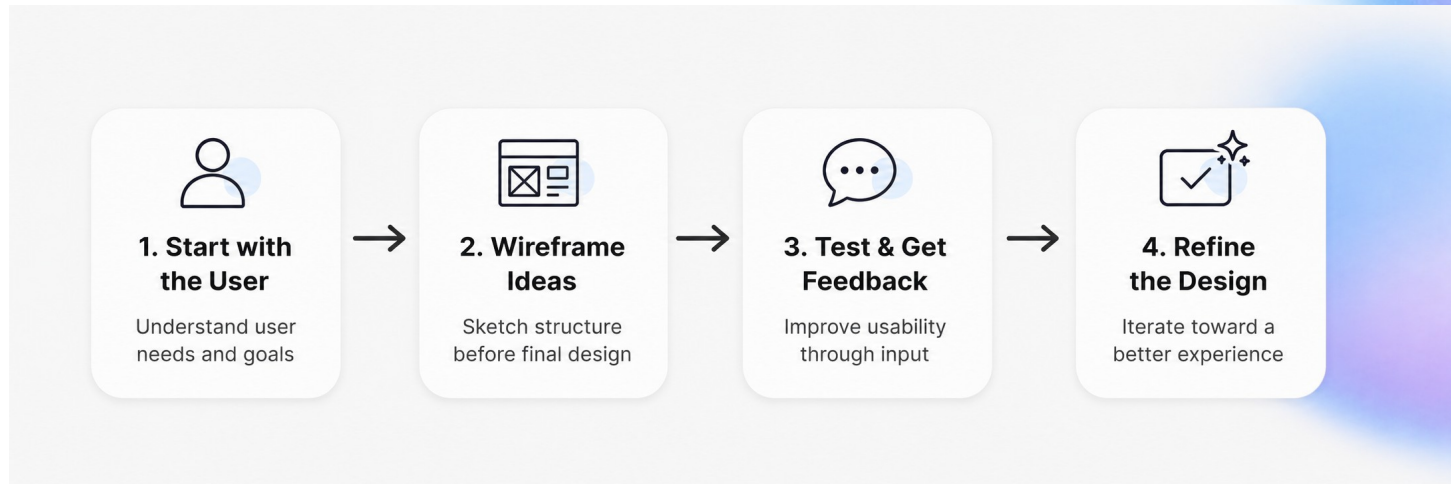

01 Product is about solving the right problem,
not building every feature

02 Evidence matters: good ideas need research
behind them

03 An MVP should focus on the features that
create the most value first

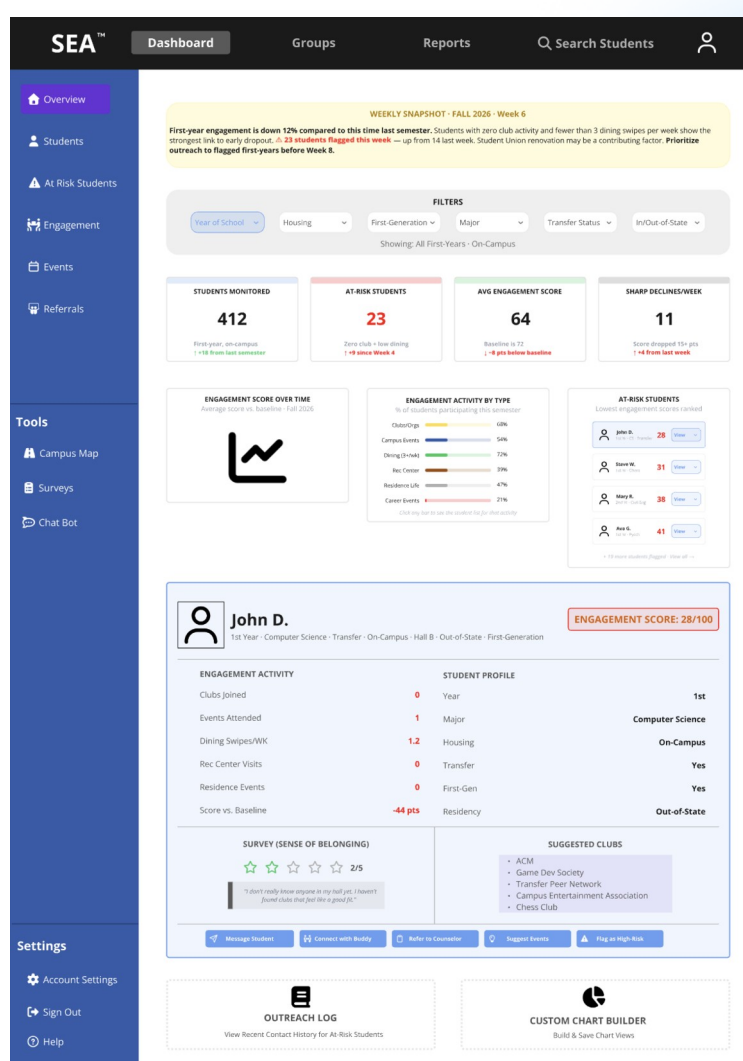

UX: What We Learned

- UX is about making products easy and useful for users
- Design thinking is human-centered, collaborative, and iterative
- Wireframes help test structure before building the final design
- Good design considers user needs, constraints, and feedback
- UX connects product ideas to what developers eventually build

UX: What We Did

- Learned the basics of UX and design thinking
- Practiced wireframing as the first step in product design
- Created dashboard mockups for the Social Engagement Accelerator
- Compared different design options as a team
- Refined ideas based on usability, layout, and user needs

UX: Key Takeaways

- 01 Start with the user: Design decisions should be based on users' needs, goals, and challenges, not just appearance.
- 02 Wireframes help teams explore layouts and identify problems before development begins.
- 03 Strong UX comes from collaboration, feedback, testing, and continuous refinement.

ENGINEERING – What We Learned

- The Software Development Lifecycle
- Agile VS Waterfall, Scrum VS Kanban
- How to manage the work of software engineer
- Tasks and how they work
- Deployment Models
- AI

THE SOFTWARE DEVELOPMENT LIFECYCLE

Analysis

Objective: Understand what users need.

Activities: Meetings, interviews, surveys, requirement documentation.

Outputs: Requirement specification documents, use cases, user stories.

Design

Objective: Plan the solution architecture.

Activities: Creating design documents, choosing technologies, architectural diagrams.

Outputs: High-level design, low-level design, design specifications.

Development

Objective: Convert design into code.

Activities: Writing code, unit tests, code reviews.

Outputs: Source code, executable software.

Testing

Objective: Ensure the product meets requirements and is of high quality.

Activities: Writing test cases, performing tests (unit, integration, system).

Outputs: Test reports, defect logs, issues, validation of requirements.

Deployment

Objective: Deliver the product to the user.

Activities: Packaging, deployment scripts, deploying to servers.

Outputs: Deployed application, release notes.

Maintenance

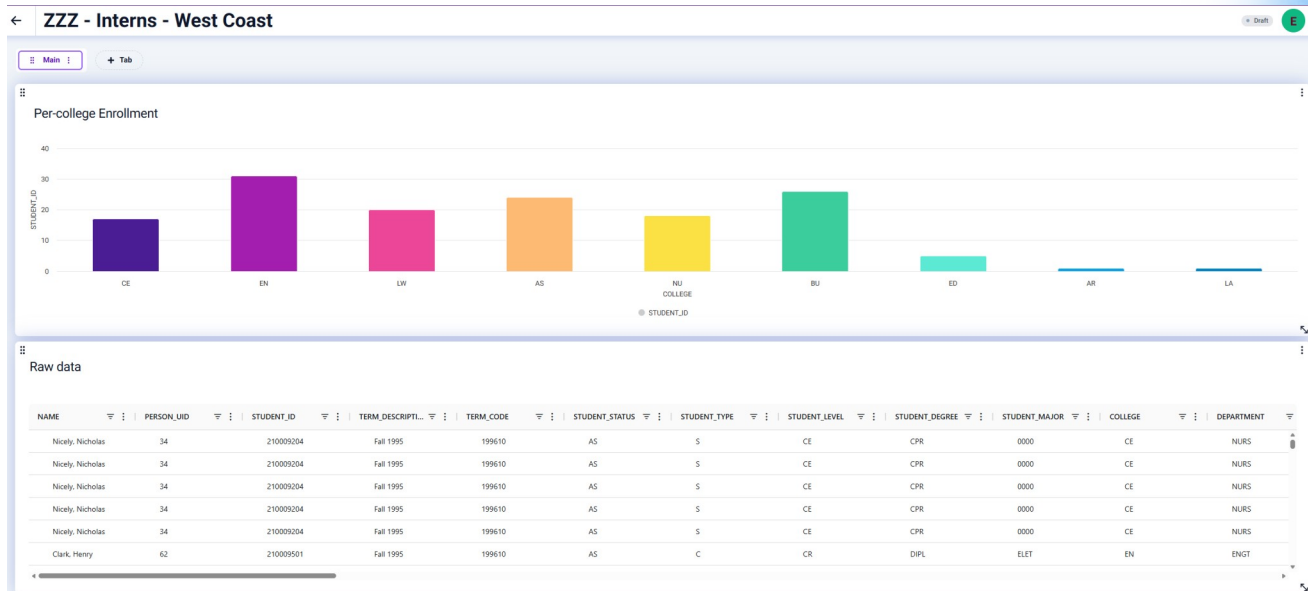

Objective: Keep the product updated and bug-free post-deployment.

Activities: Bug fixing, updates, enhancements.

Outputs: Updated versions, patches, maintenance logs.

ENGINEERING – What We Did

- Wrote Tickets for our Argos Dashboard + Designer
- Made our own Dashboards for our products

ENGINEERING – Key Takeaways

- Engineering is much more than just writing code, you need to think about other areas such as how things are deployed and what functions you even need on your application.
- Engineering also went over a lot of information related to managing and prioritizing workload which while told from their perspective, is applicable in many aspects of life from work to home

QA – What We Learned

- The Objectives of SQA
- SQA Activities and Techniques
- The Different types of test categories, Functional (Active) VS Non Functional (Passive) and their sub categories
- Making lists of different tests to make sure you don't miss things.
- QA is also responsible for testing accessibility and language.

QA - What We Did

- Created an exploratory testing plan for our products
- Attempted to produce as many possible things to test in a simple name entry field with a character limit

QA – Key Takeaways

- The Importance of testing
- The different ways testing can be done and the importance of them and the different uses they fill.
- You need to think outside the box to try every possible thing that could cause issues, having a list of things to test makes it easier to remember and try everything.

Professional Services – What We Learned

Understanding Professional Services

- Helps colleges implement and maximize Evisions software
- Training, consulting, and technical expertise drive client success

Learning Argos

- Used Data Blocks to build reports and dashboards.
- Customized dashboards for different institutional needs.

Working with Client

- Project management and collaboration ensure successful implementations..
- Professional Services partners with Sales and Customer success.

Professional Services – What We Did

1. Dashboard Project

- Built an advisor dashboard
- Customized the interface for a university

2. Development

- Added data and functionality
- Resolved dashboard issues
- Refined the user interface

3. Final Presentation

- Presented our completed solution
- Demonstrated Argos' flexibility
- Showcased real-world reporting capabilities

The screenshot displays the 'Course Schedule' interface for California State University Long Beach. At the top, the university's logo and name are visible. Below this, a navigation bar includes the title 'Course Schedule' and a 'PREVIEW' button. The main area contains several dropdown menus for filtering the schedule: 'Term' (set to '201620 - Spring 2016'), 'Campus' (with options like '1 - College Station', 'EC - East Campus', etc.), 'School/College' (with options 'AS - College of Arts & Sciences', 'BU - College of Business'), 'Department' (set to 'BUS - Business'), 'Subject' (set to 'BUAD - Business'), and 'Course' (set to '**ALL**'). A note states: 'Note: you must select value(s) from each parameter'. Below these filters is a table with the following columns: Subj, Crse, Section, CRN, Title, Max, Actual, Avail, PTRM, Start, End, Instructor Last, Instructor First, and Campus. The table contains two rows of data:

Subj	Crse	Section	CRN	Title	Max	Actual	Avail	PTRM	Start	End	Instructor Last	Instructor First	Campus
BUAD	265	0	21751	Statistics and Problem Solving	0	0	0	1	01/04/2016	05/27/2016			East Ca
BUAD	280	0	21754	Business Software/e-commerce	25	0	25	1	01/04/2016	05/27/2016			East Ca

Professional Services – Key Takeaways

Client Success Data & Technology Professional Growth

- Collaboration drives successful implementations
- Strong client relationships create lasting value
- Argos transforms data into actionable insights
- Custom reporting meets institutional needs
- Developed technical and problem-solving skills
- Gained real-world experience working through a client-focused project

Biggest Takeaway

Professional Services combines technology, collaboration, and expertise to create lasting value for higher education institutions.

MARKETING – What We Learned

- 01 What is marketing and creating a brand
- 02 Content marketing
- 03 Email marketing
- 04 Social media marketing
- 05 Event marketing

MARKETING – What We Did

Social Media

Carter Ward

Caption

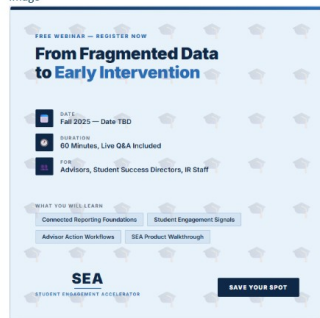

Most campuses have the data to identify a struggling student. It just lives in ten different systems and nobody is looking at all of them at once.

Join us for a live webinar where we walk through how institutions like UAH built a connected reporting foundation with Argos, and how the Social Engagement Accelerator takes that a step further by turning engagement signals into real advisor action.

If you have ever wanted to make the case for a better student success data strategy at your institution, this one is for you.

Save your spot. [\[link\]](#)

Subject

Webinar: Accelerating Student Success with Data-Driven Insights

Body

Student success is a campus-wide effort, but many institutions struggle to turn data into meaningful action.

Join us for an upcoming webinar, "**Accelerating Student Success with Data-Driven Insights**," where we'll explore how Student Growth Accelerator helps colleges and universities identify opportunities, improve outcomes, and support students throughout their academic journey.

During this session, you'll learn how institutions can:

- Gain a holistic view of student engagement, performance, and progress
- Identify students who may benefit from proactive support and intervention
- Monitor key success metrics through intuitive dashboards and analytics
- Break down data silos and foster collaboration across departments
- Use actionable insights to improve retention, persistence, and completion rates
- Empower campus leaders with the information needed to make informed decisions

You'll also see a live demonstration of Student Growth Accelerator and discover practical strategies for using data to support institutional goals and enhance student experience.

Whether you're in student affairs, academic advising, institutional research, enrollment management, financial aid, or executive leadership, this webinar will provide valuable insights into creating a more connected and student-centered campus.

CTA

Reserve your spot today and learn how Student Growth Accelerator can help your institution transform data into action and accelerate student success.

MARKETING – Key Takeaways

Creating posts is not all fun and games

Know your audience

Brand consistency builds trust

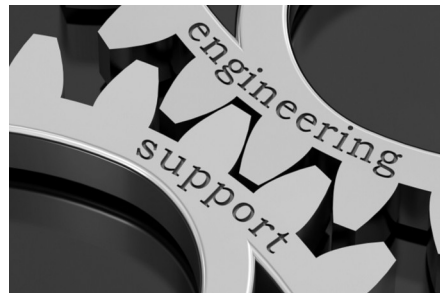

Marketing is collaborative

SUPPORT – What We Learned

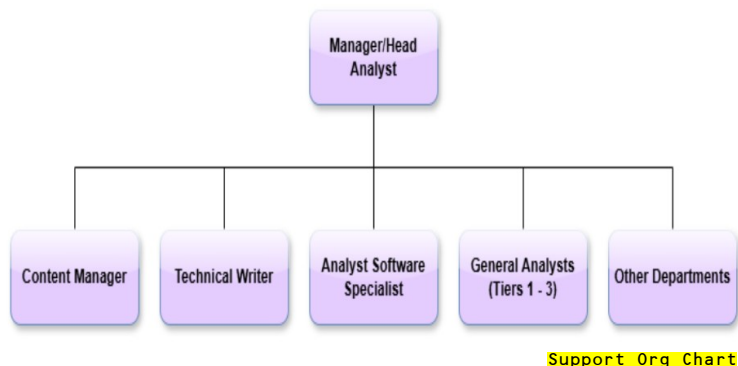

- How support performance gets measured, including customer satisfaction and response time targets
- How a case moves through the escalation chain when it gets too complex for one person to solve
- The difference between troubleshooting a problem for a customer and building something new for them
- How support connects to engineering, since most bugs and product issues start as a support case

How satisfied are you with *

Ease of Use	☐	☐	☐	☐	☐

SUPPORT – What We Did

SEA: Understanding Low Engagement and At-Risk Students

Summary

Defines what low engagement means in SEA and explains how the At-Risk Students list should be used by campus staff.

What the content is

Explains how students are flagged based on engagement score and recent activity.

Shows why filters like term, major, housing, and risk level matter.

Helps staff decide when outreach or follow-up is needed.

What it is meant for

Advisors, student success teams, and support staff who monitor students who may be disconnecting from campus.

Why this KB is needed

This KB helps teams find students early, before low involvement turns into a bigger retention problem.

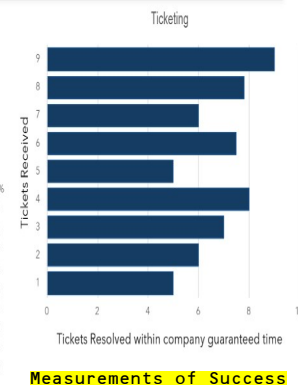

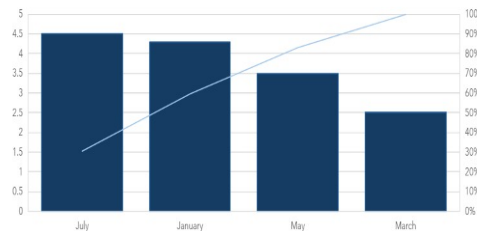

KB Article

Functional Use: Support, Student Affairs, Advisors, Customer Success

Support:

Solving Measurement	Percentage
Solved at First Meeting	85%
Required Follow Up	15%

Positive Customer Feedback

Service and Support

- Submitted through a dedicated SEA Support Portal, separate from the general Evisions helpdesk
- Monitored Monday through Friday, 6:00 AM to 6:00 PM CT
- All requests must include institution name, affected feature area, and expected versus actual behavior
- A named support contact assigned to each account within 5 business days of contract signing

Response Priority Tiers

- Critical:** Dashboard inaccessible or scores not calculating institution-wide. Response within 2 hours, 7 days a week
- Significant:** Core feature broken but platform accessible. Response within 4 business hours
- Moderate:** Data displaying incorrectly, filter returning inconsistent results. Response within 2 business days
- Informational:** Navigation questions, feature clarification, non-urgent configuration. Response within 4 business days

Platform Availability and Integrations

- 99.7% monthly uptime guaranteed; clients receive a 5% billing credit per full percentage point below the threshold due to an Evisions-side failure
- Planned maintenance scheduled weekends between 11:00 PM and 3:00 AM CT with 5 business days advance notice
- Evisions monitors all managed integration pipelines and notifies clients within 3 business hours of a detected sync failure
- Clients receive a monthly integration health report covering sync success rates, data latency, and incidents
- Failures originating in the institution's own campus systems are outside scope

SLA

Also wrote troubleshooting & escalation process + pricing & licensing model

SUPPORT – Key Takeaways

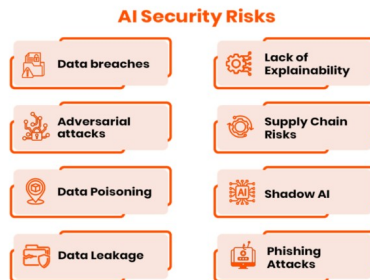

- Asking the right questions early prevents wasted time chasing the wrong problem
- Consistent communication keeps small issues from turning into bigger frustrations
- Protecting the line between support and paid work matters more than it seems
- Support is as much about relationships and trust as it is about fixing the issue

— IF YOUR —
CUSTOMERS
DON'T TRUST YOU,
YOU DON'T HAVE
CUSTOMERS

DEVOPS – What We Learned

- Learned how DevOps evolved from a divided developer and operations model into a shared culture, and how Evisions runs everything on AWS instead of physical servers
- Learned the three-part cybersecurity framework, covering traditional security tools, compliance standards, and data privacy
- Learned the major AI security risks, including model poisoning, prompt injection, and shadow AI

DEVOPS – What We Did

From: Evisions It Support it-support@evisions-help.com
To: everyone at Evisions
Reply to: Evisions help desk support@evisions-help.com
Subject: Action Required: Multi-Factor Authentication Update Needed
Body:

Dear Team,

As part of our ongoing security improvements, all employees are required to verify their Multi-Factor Authentication (MFA) settings before **5:00 PM today**.

During a recent security review, we identified several accounts that may require revalidation. To prevent interruptions to your email and company applications, please verify your account.

Click the button below to complete your verification:

Update My MFA Settings

If your account is not verified before the deadline, access to Outlook, Teams, and other company resources may be temporarily restricted until verification is completed.

If you have already completed this process within the last 24 hours, no further action is required.

Thank you for helping keep Envisions secure.

A Zoom recording of an engineering meeting.

AI Security Game

TABLETOP

Scenario

- It is Tuesday morning at 8:15 AM.
- The help desk begins receiving calls that employees cannot access shared files. Within minutes, several users report seeing a ransom note on their desktops demanding payment in cryptocurrency.
- The attackers claim they have:
 - Encrypted critical servers
 - Stolen sensitive customer information
 - Will publish the data within 72 hours unless payment is made
- At the same time:
 - Email services become unreliable.
 - Employees begin posting screenshots on social media.
 - Local news contacts your communications team asking for comment.
 - Major customers begin calling your sales representatives.

TABLETOP

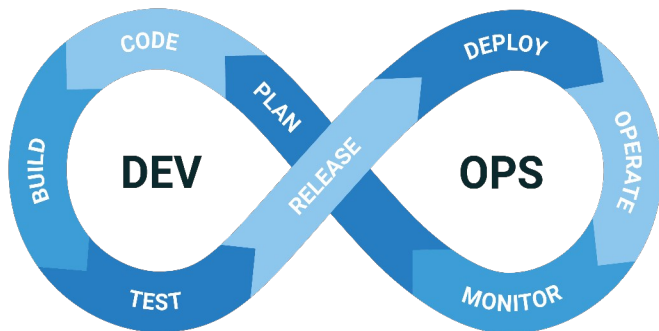

Tabletop Exercise

And Then....

- The company's customer portal is now offline.
- Customers cannot:
 - Place orders
 - View invoices
 - Submit support requests
- Attackers demand:
 - \$2 million
 - Payment within 48 hours
- Estimated revenue loss: \$100,000 per day.
- Backups may require 10 days to restore.

DEVOPS – Key Takeaways

- Development and operations now share responsibility for keeping systems running, instead of working in isolation
- Security and compliance protect real people and carry real financial consequences, not just checklist requirements
- Preparing for a worst-case scenario in advance makes a real incident far easier to handle

FINANCE – What We Learned

- Finance vs Accounting
- SaaS Business Model and Recurring Revenue
- Financial Statements (IS, BS, SCF)
- Key Metrics:
 - Gross Margin
 - EBITDA
 - Churn
- Role of a Corporate Controller
- Personal vs Corporate budgets

Total Operating Expenses	\$3,087,450	\$3,087,450	\$3,087,450	\$3,087,450	\$12,349,800
EBITDA	(\$2,991,532)	(\$2,464,523)	(\$1,929,182)	(\$1,400,720)	(\$8,785,956)
EBITDA Margin %	(241.3%)	(139.5%)	(83.8%)	(49.5%)	(107.9%)

FINANCE – What We Did

- Estimated Employee and Operating expenses
- Built Income Sheet and Balance Sheets
- Developed Personal Budget's
- Built a SaaS Revenue Build

Income:	Monthly	Annualized
Primary Job	\$10,000.00	\$120,000.00
Loan / Grant	\$0.00	\$0.00
Gift	\$0.00	\$0.00
Investment Income	\$400.00	\$4,800.00
Rental Income	\$0.00	\$0.00
Secondary Income	\$0.00	\$0.00
Allowance	\$0.00	\$0.00
Child Support / Alimony	\$0.00	\$0.00
Total Income:	\$10,400.00	\$124,800.00

Revenue	
Software Revenue	\$352,500
Professional Services Revenue	\$5,000
Total Revenue	\$357,500
Cost of Sales	
Cost of Sales - Software	\$277,900
Cost of Sales - Services	\$103,396
Total Cost of Sales	\$381,296
Gross Margin	
Software Margin	\$74,600
%	21%
Services Margin	-\$98,396
%	-1968%
Gross Margin	-\$23,796
Operating Expenses	
Sales	\$229,646
Marketing	\$106,675
Engineering and Product	\$405,225
General & Administrative	\$287,604
Total Operating Expenses	1,029,150
EBITDA	
	(1,052,946)
EBITDA Margin %	-295%

FINANCE – Key Takeaways

- Finance drives strategic business decisions
- Cash Flow matters
- Data/metrics drives decisions
- Maximize Value and Minimize Risk

Revenue Build:	
Revenue	Jan-26
NEW CUSTOMERS:	
New Units Sold	2
Price per Unit	\$30,000.00

Existing Customers Units	10
Avg Revenue per Unit	\$30,000.00
Renewal Increase %	
Existing Software Revenue	\$300,000.00
Churn Rate	3%
Churn \$	-\$7,500.00
Total Software Revenue	\$352,500.00
Avg Revenue per Unit (ARPU)	\$29,375.00
Services Revenue	
Price per Unit	\$2,500.00
Price Increase %	1%
Total Services Revenue	\$5,000.00
Total Revenue	\$357,500.00

HR – What We Learned

- Hiring and onboard process
- How to improve our resumes + feedback
- Compensation and benefits in both employer and HR perspective

HR - What We Did

Name Carter Ward, Logan Foster, Athziri Vega, Jeremy Martel	Team / Department West Coast	Internship End Date 7/31/2026
--	---------------------------------	----------------------------------

Phase	What I Will Do	My SMART Goal for This Phase
Days 1–30 LEARN		

Focus Area	Specific actions, habits, or behaviors you'll prioritize	Write your SMART goal here — be specific about what success looks like by Day 30
Customer Communication	Will learn how to respond in a professional tone, ask clear questions, and avoid Vague answers.	Being able to explain issues clearly without overcomplications and be confident in your solutions
Learning Company Software	Spend time learning how software works, what main features do, and how customers would use it.	Be able to explain the software clearly, understand the customer's issue better, and know where to look when troubleshooting.
Learn how different Departments work together.	Pay attention to how support, engineering, marketing, sales, and customer success work together. Ask questions about each team's role.	Be able to explain the purpose of the different departments and how they collaborated with one another.

Days 31–60 CONTRIBUTE		
Focus Area	What will you own, build, or deliver in this phase?	Write your SMART goal here — what measurable output will you have by Day 60?

Relationships	Reach out to other employees rather than waiting for them to engage.	Have started conversations with fellows more than they had to reach out to me.
Delivery	Complete some tasks or projects rather than having only ongoing ones.	Have completed some tasks, amount would depend on role and tasks given.
Improvement	Get better at some skills and tasks, either through speed or quality, depending on relevance.	Either get more done or get it done better depending on what is more important.

Days 61–End LEAD		
Focus Area	How will you show initiative, ownership, and growth?	Write your SMART goal here — what will you point to at your final check-in?

Process Improvement	Identify one inefficiency in the onboarding process and bring a proposed solution to my manager rather than just flagging the problem.	By my final check-in, I will have presented one process improvement recommendation backed by specific examples from my first 90 days.
Ownership on a Capstone Project	Take full ownership of a defined project, such as building an updated onboarding resource or a market comp summary, from start to finish.	By my final check-in, I will have delivered one completed project to my manager that is ready to be used or shared without further edits.
Future Goal Setting	Reflect on what I learned across all 3 phases and come prepared for my final check-in with clear goals for what comes next in my career.	By my final check-in, I will present 3 specific goals for the next 6 months of my career along with the concrete steps I plan to take toward each one.

Name Enter name Delaney, Eadlin, Mike, Sourish	Team / Department Enter team / department East Coast Interns	Internship End Date Enter internship end date July 29th, 2026
--	--	---

Phase	What I Will Do	My SMART Goal for This Phase
Days 1–30 LEARN		

Focus Area	Specific actions, habits, or behaviors you'll prioritize	Write your SMART goal here — be specific about what success looks like by Day 30
Learn Evisions Products	Learn the core products, customers, and how different departments work together by attending training sessions and asking questions.	By Day 30, I will understand the core Evisions products, company structure, and customer workflow by completing all onboarding sessions and summarizing key takeaways from each department.
Build Relationships	Meet with teammates from different departments and actively participate in meetings.	By Day 30, I will introduce myself to at least 10 employees across different departments and build a network of contacts I can learn from throughout the internship.
Learn Business Processes	Observe how support, product, engineering, finance, and customer success teams solve problems.	By Day 30, I will document at least five business processes or workflows that I can explain during my internship review.

Days 31–60 CONTRIBUTE		
Focus Area	What will you own, build, or deliver in this phase?	Write your SMART goal here — what measurable output will you have by Day 60?

Project Contribution	Contribute to internship projects by completing assigned deliverables and incorporating feedback.	By Day 60, I will complete all assigned project deliverables on time while incorporating feedback from my manager and teammates.
Documentation	Create clear documentation, presentations, and process guides that support the team.	By Day 60, I will create at least three professional documents or presentations that can be used by my team after my internship.
Problem Solving	Participate in discussions, ask thoughtful questions, and contribute ideas during meetings.	By Day 60, I will actively contribute at least one idea or improvement during each major project discussion and demonstrate increased confidence in team meetings.

Days 61–End LEAD		
Focus Area	How will you show initiative, ownership, and growth?	Write your SMART goal here — what will you point to at your final check-in?

Ownership	Take responsibility for completing projects independently with minimal supervision.	By the end of my internship, I will independently complete my assigned projects while meeting deadlines and maintaining high-quality work.
Continuous Improvement	Identify opportunities to improve a process, presentation, or workflow.	By the end of my internship, I will recommend at least one process improvement that helps improve efficiency or communication for the East Coast Team.
Professional Growth	Reflect on everything I've learned and share my experience with my manager and fellow interns.	By my final internship review, I will present my accomplishments, key lessons learned, and how I contributed to the East Coast Team while identifying goals for my future career.

- Total Comp Reality Check
- 30-60-90 Plan

Name Athziri Vega	Target Job Title Human Resources Generalist	Target City / Region Los Angeles
Comp Element	What You Found (source in parentheses)	Your Reaction / What This Means to You
Base Salary	\$60000-\$70000(Glassdoor)	For entry level it sounds right
Annual Bonus / Variable Pay	5-15%	Does this change overtime?
Health Insurance Type	HMO, PPO, HDHP with HSA, dental and vision insurance	Is there a huge difference between them all or are we able to choose?
401k Match	4-6% with quick vesting	Does it take time to be eligible?
PTO / Leave	15-20 days	Is it the same for entry level?
Remote / Hybrid	Hybrid, 2-3 days remote	Prefer if it's more time on-site
Perks / Other	Hybrid flexibility, wellness benefits, HR certifications(reimbursement)	It might be different for multiple companies, but I might use them

HR – Key Takeaways

- HR is there to help and support you
- HR is about creating a reliable and efficient workplace by contributing to employee growth
- HR supports the culture employees build

CST – What We Learned

Gained an understanding of the Customer Success Team's role in building strong customer relationships, driving product adoption, and ensuring customer success.

Learned how collecting and analyzing customer feedback through surveys, interviews, user groups, and tools like Argos helps improve products and customer experiences.

Developed skills in designing effective feedback programs, including creating meaningful questions, testing feedback methods, and planning implementation strategies.

CST – What We Did

Collect Results:

1. online survey with 5-10 questions with a few open ended questions
2. Send survey by email after a ticket is resolved

Use a 1-5 rating scale plus a optional comment box for any additional feedback

Identify participants:

- Target customers or users that use the product

- Submitted a support ticket
- Attending a training session
- Use customer id's or emails to track responses

Measure Success:

- Get a response rate of 40-50% with a satisfaction score of 4/5
- Customer comments, identify any common themes and areas for improvement
- Renewal rate: higher satisfaction should lead to stronger customer retention.

Script: "Thank you for taking the time to speak with us. We're developing the Social Engagement Accelerator, a platform designed to help colleges measure student engagement and identify students who may need additional support. We'd like to learn about your experience so we can improve the product."

Interview Questions:

1. How do you currently identify students who are becoming socially disengaged on campus?
2. Which engagement data would be most valuable for you to see in one dashboard?
3. Tell me about a time when having earlier visibility into a student's engagement could have changed the outcome
4. Which features of the Social Engagement Accelerator would save you the most time or improve your decision making?
5. If you could improve one part of the social engagement accelerator, what would

- We talked about the types of feedback methods

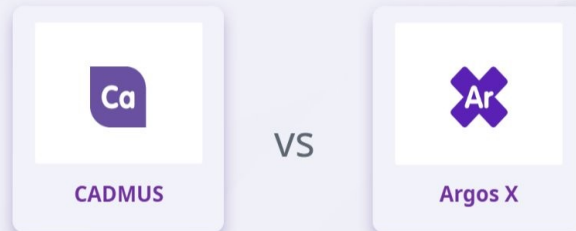

- Interns made there own feedback method and came up with interview questions

CST – Key Takeaways

Customer feedback is most valuable when it is collected intentionally, analyzed thoughtfully, and turned into actionable improvements.

Successful Customer Success teams are proactive—they educate customers, solve problems, build relationships, and advocate for customer needs across the organization.

Continuous improvement depends on collaboration, clear communication, and using customer insights to make informed decisions that enhance products and services.

SALES – What We Learned

1. Building trust

2. Know the product

3. Value wedge

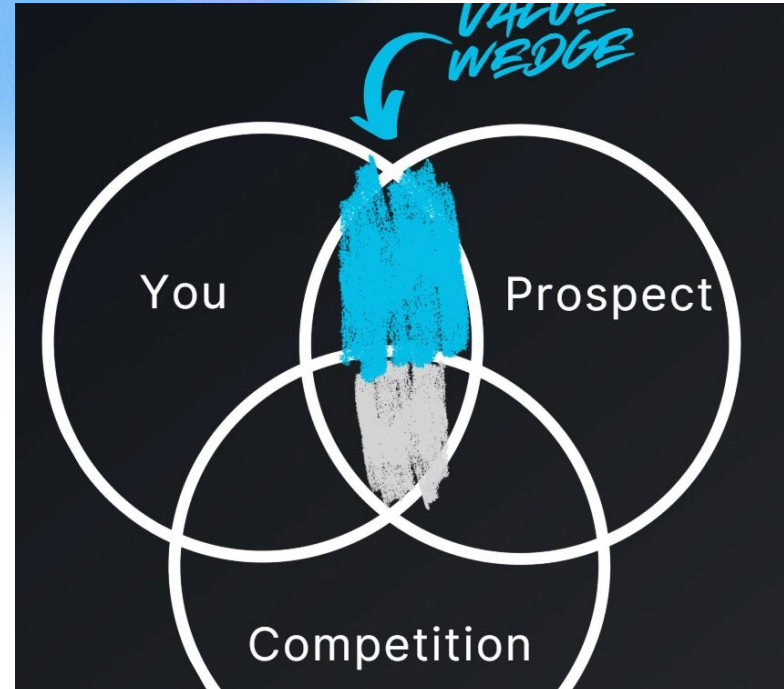

-Important to your prospect

Solve the customers biggest problem or goal

Show what makes your solutions different from the competition.

- -Defensible

Show your value with proof, know the product, and talk about your success

SALES – What We Did

- In the interview sell yourself
 - Be confident and do research
 - Visualize yourself in the company role and adjust your approach
 - Ask questions like "what" and "how" to see if you're a good fit for the company

INTERVIEW QUESTIONS

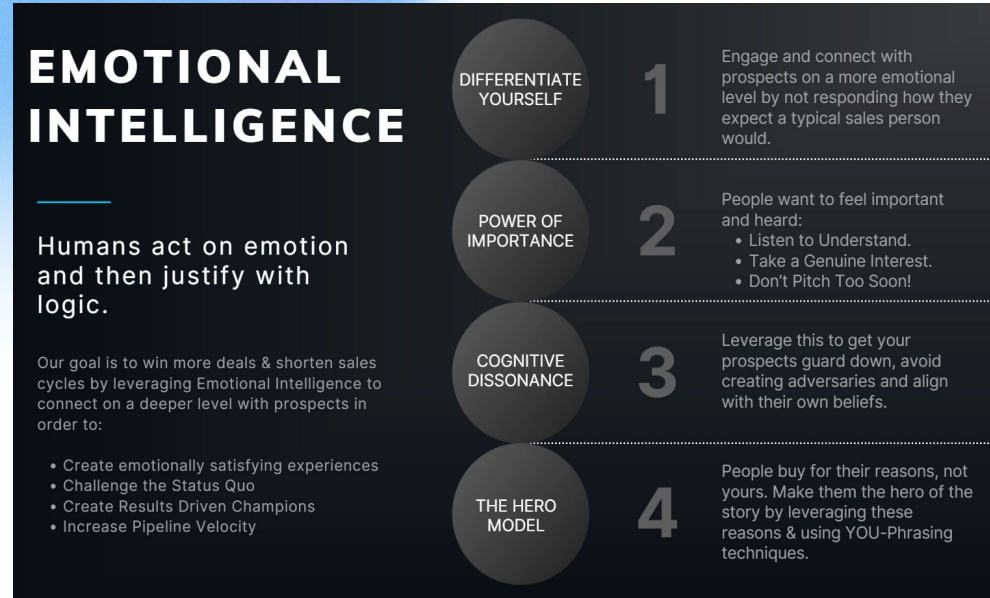

- "What are your top goals that you want to achieve in the next 6-months/year?"
- "What would you say are the biggest challenges standing in the way right now?"
- "How do you see the person you hire would make the biggest impact towards overcoming those challenges & achieving these goals in the first 90 days and beyond?"
- "What would it mean for the team and the company to be able to achieve these goals in your desired timeframe?"
- "How do you see that impacting the perception of your department with Sr. Leaders across the company?"
- "What is your long term vision for the team and how do you see your new hire helping you get there?"
- "You're going to interview a lot of people who can probably do this job, Rich, but in your opinion, what does a high performer actually look like?"
- "What will I have had to do for you to look back in a year from now and think, wow, that was a great hire?"

SELL ME THIS PEN

SALES – Key Takeaways

- Demos- know the product
- Understand the customers
- Keep everyone engaged (call names out)
 - Ask questions
 - Use simple language
- Emotional intelligence
- Sell yourself and build trust!!!

03

FRIDAY COURSES

**Website:**

<https://www.thepaintedturtle.org>

Tax ID Number (EIN):

95-4612481

Mission Statement:

Provides free, medically safe camp experiences for children with serious illnesses while supporting their families.

Annual Budget:

Approximately \$4.7 million

Target Population:

- Children with chronic or life-threatening illnesses
- Families and caregivers

Programs & Services:

- Summer Camp
- Family Camp Weekends
- Hospital Outreach
- Adaptive Recreation
- Family Support

Needs

- Financial donations to keep camp **100% free**
- Corporate sponsors and grants
- Volunteers (camp counselors & medical professionals)
- Recreational equipment and camp supplies
- In-kind donations and fundraising support
- Community awareness and partnerships

CSR Strategy

- Sponsor a week of camp or hospital outreach
- Employee volunteer days at camp
- Donation matching for employees
- Provide technology and IT support
- Organize fundraising campaigns
- Donate software, equipment, or office technology

BUSINESS – Key Takeaways

Business Fundamentals

- Learned how departments collaborate to achieve shared business goals and deliver value to customers.
- Gained insight into how companies balance strategy, operations, and long-term growth.

Customer Value

- Learned that customers invest in solutions that solve problems—not simply software or features.
- Saw how understanding customer needs leads to better products, stronger relationships, and long-term success.

Professional Growth

- Developed a stronger understanding of how a software company operates across multiple departments.
- Learned the importance of communication, collaboration, and strategic thinking in a professional environment.

Biggest Takeaway

The most successful businesses create value by understanding customer needs and delivering meaningful solutions.

COMMUNICATIONS

What We Did

- Creating connections through conversation
- Deep listening and staying interested
- Interviews

Key Takeaways

- Conversations are important for networking and getting to know people
- Don't think about what to say next while listening
- Have a conversation flow smoothly, avoid interrogations

CONNECTIONS

Learned more about each other's habits and personalities

We bonded more as a group

We grew new personal skills

Learned to sit and listen before thinking about what to say next

04

PERSONAL
REFLECTIONS

Mike Wouters

Main takeaways:

- Teamwork and communication
- Operations aspects of Evisions
- Building connections

What's next?

- Starting my junior year at Northwood University pursuing my Degree Business Adm
- Make more connections
- Another internship next summer!

Delaney Niebo

Main takeaways:

- I got to experience what a company based around technology would be like.
- I could still participate and learn even without having a tech or engineering background
- I built my communication skills and learned to work in a remote environment

Whats next?

- Graduate in December
- Start my career hunt!

Jeremy Martel

CALIFORNIA STATE UNIVERSITY
LONG BEACH

My Biggest Takeaways

- I learned to think beyond my own role and understand how each department contributes to the company's success.
- I realized that solving customer problems creates more value than simply delivering a product.
- I gained a greater appreciation for collaboration and communication across teams.
- Long-term success comes from continuous learning, adaptability, and building trust with others.

What's next?

- Complete my Business Finance degree at CSULB.
- Pursue opportunities in finance, strategy, and business operations.
- Continue building meaningful relationships through networking and mentorship.
- Continue learning through hands-on experience and real-world challenges.

Sourish Gadhi

Main takeaways:

- Operations aspect of company
- Improved networking and communication skills
- Gained real-world business and finance experience

Whats next?

- Return to Babson as sophomore studying finance and entrepreneurship and continue playing on tennis team
- Network and another internship next summer
- MBA in Finance and possibly transfer schools for tennis as grad transfer
- Explore careers in wealth management, private equity, and real estate.

Eadlin Morrissey

- **Main Takeaways:**

- Learned how different departments in a software company work together
- Saw how research, data, and user feedback shape product decisions
- Built confidence presenting ideas and communicating with a team

- **Post-Internship:**

- Return to Pitt as a sophomore studying Political Science in the Frederick Honors College
- Continue rowing, Model UN, and policy-related work
- Keep exploring career paths
- Network and work on future opportunities and internships

Carter Ward

Main takeaways:

- Rotated through multiple departments to see how Evisions operates as a whole
- Applied new skills by working on a mock product
- Gained insights from courses on topics like philanthropy, business, etc.
- Adapted to a remote work environment and new tools across each rotation
- Built a large number of networking connections across the company
- Strengthened professionalism and communication skills that will guide me in the job market

What's next?

- Explore my career options with an open mind
- Get my foot in the door with job opportunities
- Build my network and maintain strong references
- Work on passion projects and showcase them
- Aim for a long-term career with strong benefits and room to advance
- Stay motivated and curious, and keep learning what is best for my future

Athziri Vega

Main takeaways:

- Always be curious and ask questions when starting at a new company.
- Networking is important!
- Help solve customers' problems rather than focusing on numbers.
- Every department is there to work together.
- Communicating is a must, especially in an online environment.

What's next?

- Second year at Cal Poly Pomona, pursuing a degree in Business Administration.
- Seeking more internships.
- More networking + enhancing my LinkedIn.
- Researching non-profits/foundations!

Logan Foster

Main takeaways:

- Scheduling is more important when working digitally, since you can't just walk over to someone else's desk.
- Most departments do a lot more than you think they do, having responsibilities you didn't consider before.
- Networking is vital when it comes to job hunting.
- Departments all work together for most projects in some aspects and communication is key.

What's next?

- Job Hunting for my first "real" full time job.
- More networking + enhancing my LinkedIn.

05

PROGRAM FEEDBACK

Feedback

Suggestions:

- Shorten or restructure Open House sessions by having interns primarily attend the departments most relevant to their rotation
- Balance department lectures with more interactive work sessions so interns get hands on practice rather than sitting through back-to-back presentations
- Add a Friday professional development course that includes a resume workshop, interview tips, mock interview practice, and guidance on transitioning from an internship to a full-time role

What we liked/what to keep:

- Friday professional development sessions
- Department shadow days and team meeting observations
- Exposure to multiple departments across the company
